SUMMARY

Full-stack engineer with strong AI/ML background. Deploy lightweight vision models on edge devices, build privacy-preserving browser agents, and create AI-powered productivity tools.

EDUCATION

Jain University – B.Tech Computer Science (AI-Driven DevOps)

2024-2028 • CGPA: 9.2/10 (expected)

SELECTED PROJECTS

• Disaster Detection Drone (Star Project)

Disaster Detection Drone – YOLOv11n models for flood, landslide, earthquake damage detection; ONNX, TensorRT, and OpenVINO edge deployment on Jetson-class UAVs; research paper with IEEE-style evaluation.

• Sahayak (Privacy-Preserving Browser Agent) PS 26171

Sahayak – Chrome MV3 extension + FastAPI backend for privacy-preserving web task automation; PII redaction engine achieving 1.00 recall / 1.00 precision on adversarial tests.

• Evolutionary Feature Selector

Evolutionary Feature Selector – GA reduces feature set by 50% while raising RandomForest accuracy from 97.1% to 99.4% on the breast-cancer dataset.

• FloTask

FloTask – AI-powered task manager built with React, Vite, and Gemini API; minimalist "Nothing OS" design.

TECHNICAL SKILLS

- Languages: Python, Java, C, JavaScript
- AI/ML: YOLO (CV), Genetic Algorithms, LLM (Gemini) integration, NLP, EDA
- Web: React, Chrome MV3 extensions, REST APIs
- Tools: Git/GitHub, Roboflow, Google Cloud, Jupyter, VS Code, Linux CLI

CERTIFICATIONS & ACHIEVEMENTS

- Smart India Hackathon 2026 – ISRO PS 26171 (Team Sahayak) – internal round build
- Google Cloud Study Jam – core GCP labs
- Coursera – Operating Systems, Data Structures in C, Python Crash Course
